

ISO 45001 Overview Presentation

INTRODUCTION TO ISO 45001

Occupational health and safety is always a key aspect for any good business. The 'ISO 45001 Occupational Health and Safety Management System' Standard provides a robust set of requirements specifically designed for improving workplace safety. Having an ISO 45001 Safety Management System will help protect our most important asset – **OUR PEOPLE**.

This presentation will help you better understand the core ISO 45001 processes, so that we 'THE TEAM' can achieve our intended outcomes.

WHAT IS THE ISO 45001 STANDARD?

- ISO 45001 is the International Standard for Occupational Health and Safety Management System.
- ISO 45001 has been developed by the International Organization of Standardization (ISO) and is implemented Worldwide.
- The intent of ISO 45001 is to improve worker safety, reduce risks and improve OH&S performance and create better working conditions.

WHAT IS AN OH&S MANAGEMENT SYSTEM?

- An OH&S Management System is a coordinated and systematic approach to managing health and safety risks.
- An OH&S Management System provides the framework in which the business manages its health and safety of workers.
- An OH&S Management System characterizes a set of policies, procedures, plans and practices for managing risks and enables a business to meet its obligations.

THE ISO 45001 PLAN, DO, CHECK, ACT APPROACH

The Plan, Do, Check, Act approach is the ISO 45001 system that is used to ensure that all actions are planned and checked before the activity takes place.

| | |
|--------------|--|
| PLAN | Determine and assess the health and safety risks and safety opportunities and establish health and safety objectives and processes to deliver results. |
| DO | Implement the processes required to convert the inputs into the outputs, as planned. |
| CHECK | Monitor and measure the processes and processes regarding the health and safety objectives and report the results. |
| ACT | Take actions to continually improve the health and safety performance to achieve the intended outcomes. |

CONTEXT OF THE ORGANIZATION

For ISO 45001, we need to determine the external and internal issues that are relevant and affect our ability to achieve the intended outcomes of our ISO 45001 OH&S Management System.

This may include further defining and managing the risks and opportunities of the below (internal and external) elements.

Internal

Roles and responsibilities

Workers

Working conditions

Market share

Physical

Performance

Values and

Innovation and change

Wastes and energy use

External

and competition

regulatory and statutory

Technological

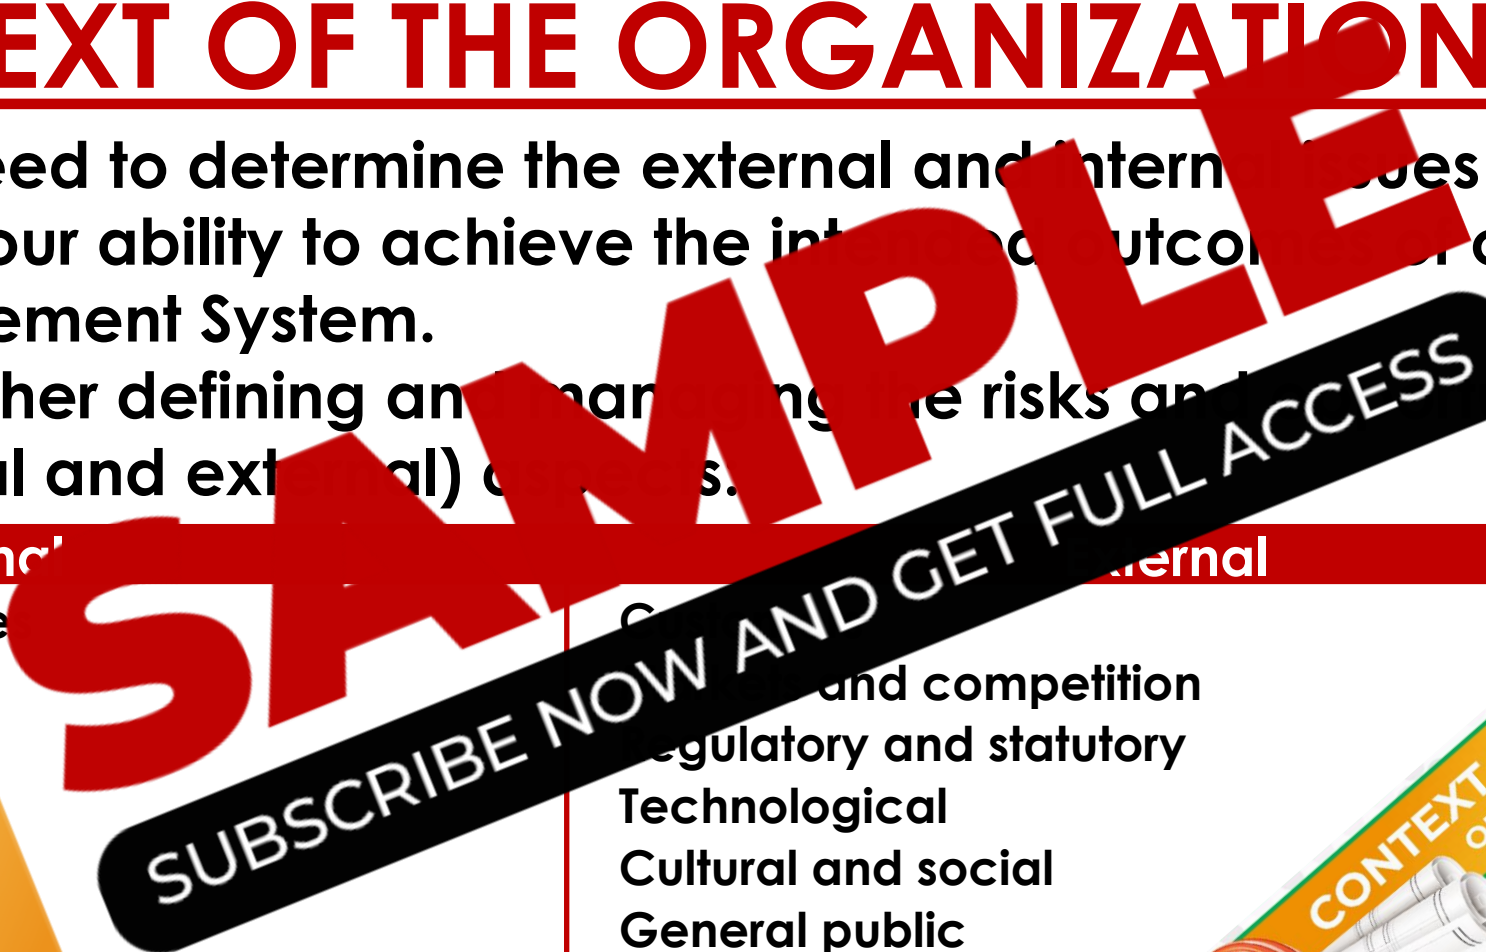

Cultural and social

General public

Suppliers

Political influence

Contractors

LEADERSHIP AND WORKER PARTICIPATION

Leadership and worker participation are critical for the success of an ISO 45001 OH&S Management System and the successful achievement of the intended outcomes.

Good leadership and worker involvement are essential for establishing processes that are central to our health and safety objectives and policy goals.

SAMPLE

- Supporting personnel in their participation with the safety vision and values.
- Sharing the ownership of safety by allowing everyone to take responsibility for their own safety and that of their coworkers.
- Challenging personnel to think about safety issues in ways that they might not have previously considered.
- Actively caring for the health, safety and the general wellbeing of all personnel.
- Recognising and rewarding personnel based on their actions of positive safety behaviour.
- Role modelling safety compliant behaviours that set the benchmark of what is expected from all personnel.
- Inspiring all personnel to achieve their safety goals.
- Ensuring all personnel understand and participate in the safety vision and values.

PLANNING

Planning for ISO 45001 is an ongoing process and this planning needs to anticipate changing circumstances when determining risks and opportunities.

A Process to Address Risks and Opportunities

SUPPORT

An ISO 45001 Safety Management System needs to have resources and competencies allocated to achieve the desired outcomes:

Resources for ISO 45001 may include competence requirements for ISO

- Human resources.
- Specialized skills.
- Infrastructure.
- Technical experience.
- Tools, equipment.
- Financial resources.
- Defined responsibilities for positions that affect the safety aspects of products, services and system conformity.

OPERATIONS

Operational planning and the control of processes is needed to implement and benefit from ISO 45001. Activities and resources to deliver these benefits include:

- The use of procedures, systems, and the compliance of workers
- Establishing preventive and predictive maintenance and inspection programs
- The identification of legal requirements and compliance obligations

PERFORMANCE EVALUATION

Contextual methods should be applied for determining which aspects of an ISO 45001 Safety Management System should be monitored, measured, analyzed and evaluated. This also forms part of ISO 45001 continual improvement process.

Audit Checklist

-  Audit Satisfactory
-  Observation Made
-  Non-Conformance

IMPROVEMENTS

ISO 45001 improvements can be gained by reviewing the results of OH&S performance and this may include:

- Risk and opportunity evaluations.
- Assessment of the changing risks and external requirements of interested parties.
- The effectiveness of the OH&S Management System.
- Reducing and eliminating negative impacts.
- Increasing the benefits and opportunities.
- The customer satisfaction.
- Internal and external audit results.

KEY ELEMENTS TO ISO 45001 SUCCESS

There are some key elements that need to be considered to ensure the successful development and implementation of an ISO 45001 OH&S Management System inclusive of:

- Determining resource gaps.
- Ensuring the support and commitment of management and the employees.
- Maintaining a focus on the fundamental elements such as the OHS policy, risk management and legal requirements.
- Ensuring that everyone is clear on what is being done, why it's being done and how to do it.
- Regular communication and feedback on progress.
- Progressing gradually and efficiently through the ISO 45001 Standard criteria.

THE BENEFITS OF ISO 45001

Some of the main benefits of having an ISO 45001 Safety Management System include:

- A healthier and safer workplace (including mental health).
- Enhanced knowledge of business risks and liabilities.
- Additional business expansion possibilities.
- An improved company image and reputation.
- Improved cost control and financial benefits.
- Evidence based decision making.
- Establishment of a culture of continual improvement.
- Improved communication and consultation processes with employees.

ISO 45001 CHALLENGES

There can also be challenges with the development and implementation of ISO 45001 Safety Management System inclusive of:

- Obtaining the awareness of ISO 45001 within the organization.
- Having the resources and dedication needed for ISO 45001.
- Interpreting the complex requirements of ISO 45001.
- Developing procedures to be documented.
- Promoting the annual improvement of the ISO 45001 OH&S Management System.

YOUR ROLE WITH ISO 45001

There are several things that you can do to make the ISO 45001 OH&S Management System work:

- Know and understand the OH&S policy and ISO 45001 objectives.
- Understand how you can contribute to the development and implementation of ISO 45001.
- Know the risks and hazards that are relevant to your work and how they are controlled.
- Complete the ISO 45001 journey where you can.
- Control OH&S risks relevant to your work.
- Be careful of others and assist wherever possible to create a better and safer working environment.

ENGAGE THE WORKFORCE

Encourage individual involvement and participation in safety. Encourage employees to report hazards and near-misses. Encourage employees to participate in safety activities.

POSITIVE RELATIONSHIPS

Build positive relationships with the workforce and build trust by listening and doing what you say you will do.

ELIMINATE HAZARDS

Work to eliminate hazards and reduce risks. Leaders who do well will have employees who are more willing to participate in safety.

ENCOURAGE NEAR MISS REPORTING

Work to prevent incidents by positively reinforcing the importance of reporting hazards and near-misses.

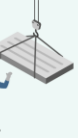

REDUCE BLAME

Blame is the opponent of engagement. Work to understand and eliminate the behavioural root causes of incidents.

USE POSITIVE REINFORCEMENT

Frequently acknowledge what employees do well. It will not only strengthen safe behaviours, it will also encourage engagement.
